Security

You will be given your own private subdomain which only you and your employees will know. Everything in the system is password protected, encrypted and secure. We also do regular backups of your database to ensure that your business is protected.

Manage your employees

Knowing who is your best performing sales employees has made easier for rewards and incentives allocation.

CLOUD-BASED & Mobile Point of Sales Inventory Management System

DEVELOPED BY:

SING-BIZ.COM

POS on-the-go

"We take mobility very seriously"

POS on-the-go | Retail Made Quick & Easy

Cost-Effective

POS-on-the-Go is a handheld device that comes with an integrated barcode scanner, thermal printer and an intuitive LCD touchscreen. A one complete solution to all your needs!

Utilize your RETAIL SPACE better

Transform big and bulky traditional POS into a light, handheld Mobile POS. Boost SALES by using the costly retail space as a platform to display more of your retail items or marketing materials.

Double your cashier as an EXTRA STAFF

Your cashier could be an additional sales staff. With POS-on-the-Go, cashiers can now be mobile and concurrently function as retail assistants. They no longer have to stand behind cash registers, and can instead be used as additional manpower to boost your sales.

CONNECT & MANAGE your business anytime, anywhere

POS-on-the-Go connects your business to the cloud. This means you can retrieve almost **REAL-TIME sales information, print reports and effectively monitor your inventory** with our simple web-based Inventory Management System. Furthermore, it is compatible with all mobile and android devices. Managing your business is now all in your HANDS!

Point of Sale Device

POS on-the-go | Retail Made Quick & Easy

"Bringing mobility to the next level"

Make sales on the go

System works in both online and offline mode so you can make a sale anytime and anywhere.

Ad-hoc discounts

Discounts given on the spot can now be recorded in the system. No hassle of tallying reports at the end of the month due to different dollar values.

Record payment modes

System allows you to state the mode of payment that the customer had paid in. Month end collections from credit card companies can be easily tallied. NOTE: System does NOT allow any form of credit/debit card transactions.

Customer relations

With the help of the web-based inventory management system you can keep track on WHAT your customers are spending on. You could then use these statistics to foster better relationships with them.

Print receipts

Issue receipts to customers easily with our built-in thermal printer. You may even customise your own company logo on receipts.

Connects to the cloud

With Wi-Fi and 3G capability, the device connects to the cloud. With the autosync function, you will always be updated with the latest sales figures which are viewable through our web-based inventory management system online.

Stocktaking

Easy-to-use stocktaking functions keeps your inventory in check. System allows an easy upload of your entire stocktake figures through the cloud for a more precise and up-to-date inventory.

End-of-day sales report

The system prints an end-of-day total sales receipt/report. This saves time and reduces human error when calculating sales, making manual calculations obsolete.
